

Summary

Full Stack web developer, with an eye for design and a mind for code, seeking a team with interesting challenges. Graduated Lambda School. 5 years of developer self learning. 10 years of web ownership and management.

Web Developer

Motivated self-starter with strong problem solving skills and able to extract clarity from nebulous situations. Highly effective motivator of teammates, prioritizing education of the individual to their own capabilities.

- Executed leadership roles as needed during class and cohort projects.
- Initiated peer programming sessions with team-mates in co-learning and troubleshooting scenarios.
- Established relationships with students in a wide range of environments.
- Applied past IT and web development experience to seemingly unrelated events and tasks.
- Completed Lambda School Full Stack Web instruction

Team Management

- Managed teams of DevOps and Programmer roles in web properties.
- Excellent communication and documentation skills.
- Implemented Action Plans for teammates, end users, and employees.

Experience Highlights

- *Lambda School Build Projects (2019 - Present):* Worked on teams of different sizes and capabilities to complete class-assigned, one-week projects. Met with teammates as needed for determining assignments and assessing rubrics. Completed individual modules on time with scores of Meets or Exceeds Expectations. Deployed using Heroku, Netlify.
- *AlpacaVids Project (Jan - Feb 2020):* Built with a team of 5 Full Stack developers and UX designer. Worked with stakeholders to clarify requirements. Wrote design documentation as a team. Worked on tasks as needed to complete the project with an overall score of Exceeds Expectations. Built using React and Ant Design frontend, with NodeJS and Postgres backend.
- *Self Employment (2002 - 2012):* Owner/operator of successful websites with millions of registrants and hundreds of thousands of daily active users. Zero months with negative income. Managed a team of Programmers, DevOps and site moderators. Worked directly with programmers on projects, the sysops for operational parameters, and moderators for general user and customer metrics.
- *Information Technology (Various):* Successfully worked alone or with little supervision. Implemented a desktop system refresh from "Request for Bid" through deployment and support/education for a college campus. Oversaw bid, purchase and installation of new computer hardware after theft at the facility
